FP2030 Commitment

TANZANIA'S FAMILY PLANNING VISION FOR 2030:

Healthy, educated, and empowered Tanzanians with equitable access to rights-based Family Planning (FP) services will facilitate informed decisions on their fertility needs towards sustainable socio-economic development.

1. Increase access and utilization of modern contraceptives among adolescents from 13% (TDHS 2015) to 20% (HSSP V) by 2025

Tanzania's Ministry of Education and President's Office, Regional Administration and Local Government (PO-RALG) will fast track the provision of Comprehensive Sexuality Education. To increase access to Adolescent and Youth Sexual and Reproductive Health (AYSRH) services—with a focus on Postpartum and Post-Abortion Family Planning services—service providers will work on building capacity and integrating these programs with other interventions (e.g. HIV, nutrition, etc.).

2. By 2030, national gender-focused programs and organizations will address gender and social norms impeding rights-based FP services

To better address the gender and social norms that inhibit family planning uptake, the government of Tanzania will work with gender-focused networks, civil society organizations, and other partners in better understanding these issues, integrating gender-responsive programs, and promoting rights-based advocacy. The government will also work with local government associations to advocate for, allocate, and disburse funds to sustain Social and Behavior Change Communication initiatives. Parliamentary associations and similar groups will drive systems-level change.

3. By 2025, increase Tanzania's modern contraceptive prevalence rate (mCPR) for all women from 27% (TDHS 2015/2016) to 42% (One Plan III)

The government will identify gaps in existing policies and guidelines in order to determine which areas need to be reviewed and harmonized. Service providers will adopt a mentorship approach for further developing knowledge and skills concerning postpartum and post-abortion family planning. Professional associations will help health care providers build capacity with regards to proper self-care for short-term contraceptive methods, documentation, and reporting.

4. By 2030, increase annual domestic financing of FP commodities by at least 10% from the current allocation of 14 billion Tanzania shillings, and disburse fully

The government will generate evidence on maternal health outcome improvements to increase allocation and disbursement for reproductive, maternal, newborn, child and adolescent health. The government will also help civil society organizations access family planning funds from other sources. Private sector actors will contribute to financing, and social marketing actors will help with implementing a Total Market Approach for generating resources. FP will also be included in public and private health insurance packages.

Approach to Accountability

The existing platforms used to track progress of commitments are DHIS 2, eLMIS, TDHS, and SDP surveys. The new platform that will be included in tracking the commitments is HRHIS. The progress will then be shared in Family Planning Sub Technical Working Group (FP Sub-TWG), data consensus building meeting and in FP semi-annual meeting.

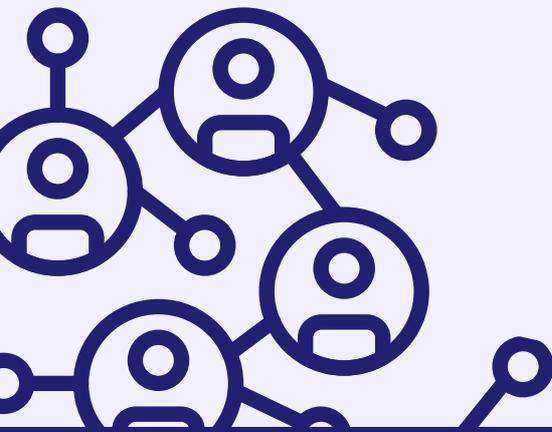

The Motion Tracker accountability tracking mechanism will be used to track progress on commitments. Community Action for prevention of teenage pregnancies accountability mechanisms will be used at the sub-national level.

This process is aligned with national plans such as HSSP V, One Plan III, NFPCIP, and ICPD25.

TANZANIA'S PROCESS FOR DATA REVIEW AND SHARING OF PROGRESS

- 1 Program annual data review meetings** where the government and stakeholders will review annual program progress will be conducted.
- 2 Semi-annual data review meetings** organized by the Government and engaging stakeholders to review the semi-annual program progress.
- 3 Monthly Family Planning dashboard data cleaning and audit** done centrally in collaboration with sub national levels.

COMMITMENT PRINCIPLES:

FP2030 Commitments should...

- Align with the country's other partnerships
- Be grounded in available data and evidence
- Address FP2030's 5 focus areas
 - policy
 - data
 - financing
 - gender norms
 - system responsiveness
- Be developed and validated through an inclusive, equitable, and transparent process
